LIME EMR · TESTING

Test cases: examples

From the LIME EMR metadata workbook, checked against the Mosul configuration

1. Form rules: generated from the form tabs

Each Skip logic, Mandatory and Lower/Upper limit entry gives one or two test cases, checked against the form in the EMR.

What the form tab says	Test case	Today
F17, « By whom / from where »: Hide question if [Referred to MSF] !== 'Yes'	I answer « Yes » to « Referred to MSF » → « By whom / from where » appears. I answer « No » → it does not appear.	✅ Matches
F17, « Weight at admission (in kg) »: Lower limit 0	I enter -1 → the value is refused.	✅ Matches
F48, « Management of reactions »: Hide question if [Reactions] !== 'Fever', ..., 'Other'	I tick « Other » in Reactions → « Management of reactions » appears.	❌ The form does not show it for « Other »

Release 1 workbook: 3,862 test cases generated, 3,533 matching the EMR.

2. Other rules of a question: the Comments column

One line per test in the Comments column of the form tab: Test: what I do -> what I should see.

Tab, question	Comments column	Today
F35, PHQ-9 score	Test: Answer « Nearly every day (3 points) » to the 9 questions -> PHQ-9 score = 27	✅ Matches
F48, Completion date	Test: Enter a completion date before the start date -> Message « Completion date cannot be before start date »	✅ Matches
F17, Order medications	Test: Click « Order medications » -> The order basket opens	✅ Matches

3. Beyond one question: the User flow template tab

One step per row. Action is what I do, Description is what I should see, User is the EMR role (workbook role name in brackets).

Step	Action	Description	User	Today
ROLES-1	Open the patient chart of a mental health patient	Mental health encounters are not visible	Registration Officer (Registration Clerk)	✅ Matches

Step	Action	Description	User	Today
ROLES-2	Open an F31 mhGAP Baseline, go to Clinical diagnosis	The section is read-only (no « Edit sensitive mental health fields » right)	Mental Health Nurse	❌ Not locked in F31 (it was in F03)
ROLES-3	Try to order a lab test	No lab order option (matrix: « Order lab test » blank)	Mental Health Counselor (MH counselor)	❌ The EMR role can add orders
APPT-1	Book a follow-up appointment	Services: Mental Health, and Mental Health - AB, DT, KA, SA, SK	Mental Health Counselor	✅ Matches
REG-1	Register a new patient	An MSF ID is generated automatically: prefix IQ146-, at most 16 characters	Registration Officer	✅ Matches
DHIS2-1	Save an F31 mhGAP Baseline with a PHQ-9 score	After the daily sync (17:00), the PHQ-9 score is in DHIS2	Automatic	✅ Mapped
