LIME EMR · TESTING

Test cases: Mosul implementation

Examples taken from the Mosul configuration in LIME EMR

Form test cases (skip logic, limits, calculations, translations) live with each form: they are generated from its tab in the metadata workbook and run once in the distro, for every site using the form (Release 1 workbook: 3,862 cases, 3,533 matching). They are not repeated per implementation.

Implementation test cases check what is specific to a site. The examples below come from the Mosul configuration in the LIME EMR repository and go in the User flow template tab of the workbook.

Login, language, registration

Step	Action	Description (what I should see)	User	Mosul config
LOGIN-1	Log in	Two locations offered: Mental Health (MH) / الصحة النفسية, and Registration Counter (REG) / تسجيل المستشفى	Any user	Locations
LANG-1	Change the language	English and Arabic offered; English by default	Any user	Global properties
REG-1	Register a new patient	MSF ID generated automatically (prefix IQ146-, at most 16 characters); Legacy MSF ID optional	Registration Officer	Identifier generator, registration
REG-2	Enter the patient address	Address picked level by level: Iraq > Ninawa > district (Mosul, Sinjar, Talafar…) > area	Registration Officer	Address hierarchy
REG-3	Register a patient whose name is unknown	Registration is allowed	Registration Officer	Registration
REG-4	Open the patient chart	A « Print identifier sticker » button is available	Registration Officer	Label printing

Access, visits, appointments

Step	Action	Description (what I should see)	User	Mosul config
ROLES-1	Open the patient chart of a mental health patient	Mental health encounters are not visible	Registration Officer	Roles
APPT-1	Book a follow-up appointment	Services: Mental Health, and Mental Health - AB, DT, KA, SA, SK	Mental Health Counselor	Appointment services

Step	Action	Description (what I should see)	User	Mosul config
VISIT-1	Start a visit	Visit types offered: OPD Visit, ER Visit, IPD Visit, Telehealth	Mental Health Counselor	Visit types
VISIT-2	Leave an OPD or Telehealth visit open	The visit is closed automatically	Automatic	Global properties
EDIT-1	Edit a form saved more than 24 hours ago	The form can no longer be edited	Mental Health Counselor	Patient chart
RDE-1	Enter data for a past visit	Retrospective data entry is available	Mental Health Counselor	Feature flags
DHIS2-1	Save an F31 mhGAP Baseline with a PHQ-9 score	After the daily sync (17:00), the PHQ-9 score is in DHIS2. Exported forms: F00, F29 to F34	Automatic	OpenFn workflow

Differences found while writing them

Step	Expected	In the configuration
ROLES-2	MH counselor cannot order lab tests (User roles and privileges tab)	Mental Health Counselor can add orders
VISIT-2	Auto-closed visit types match Mosul visit types	The list also names « Home Visit », which is not a Mosul visit type
